

Boscawen Planning Board  
Site Walk  
7.29.2023 8:00AM  
477 High St.

Attendance: Loren Martin – Chair, Barbara Randall – Vice Chair, Ed Cherian, Gary Tillman, Josh Crawford

Also Present: Spencer Tate—Wetland Scientist for Meridian Land 24 Services Inc; Eric Munro—Representative for Building & Loan Development

Members of the Public: Scott Martin – Abutter, Jim Colby

---

Discussion began with which areas were deemed of most interest. It was decided that the assembled group would walk the proposed “road”.

Areas of interest included:

- Test pit locations
- Wetlands
- Area of proposed infiltration basin
- Area of proposed bioretention drafting basin
- Area of proposed 4’ box culvert
- Area of proposed catch basin
- Proposed curbing
- Open Space

Spencer Tate explained the grading of the road that would occur, and approximate placement of culverts and basins. Locations of test pits and lot borders were pointed out during the site walk, as well as the area of the proposed open space.

The site walk concluded at 9:15 am, with less people than started.

Respectfully Submitted by Barbara Randall
