FACILITIES ENGINEER

CHRIS PETERSON

Construction Notice Letter

Town of Boscawen Residents

Dear Neighbors:

My name is Chris Peterson and I am the Facilities Engineer with the County of Merrimack.

I want to inform you of an upcoming project starting on or about 5/31/2023. The County will begin work on several projects in and around the Merrimack County Waste Water Treatment Facility located at 314 Daniel Webster Highway Boscawen, NH 03303.

The work taking place at the Waste Water Treatment Facility will include lagoon sludge removal, lagoon liner installations and several upgrades to the facility infrastructure.

The work will have minimal impact on town residents living close to the Nursing Home and Department of Corrections. You can expect some heavier than normal truck traffic going into and out of the Treatment Plant during daylight hours Monday thru Friday.

The County will comply with the Construction Conduct Standards of the Town of Boscawen. Our contractors and our material suppliers will be parking their vehicles temporarily on the construction site within the confines of the County property on the east side of Rt-3 around the Entrance/ Exit of the Dept. of Corrections.

The sludge removal portion of this project is expected to be completed by November 2023.

If you have any questions or comments, you may contact me directly by email at cpeterson@merrimackcounty.net or by telephone at 603-796-6876.

The County looks forward to a successful construction project while being good neighbors.

Sincerely,

Chris Peterson
Facilities Engineer
