Re: **Upcoming Field Work Notice**
Sewer and Water Improvements Phase 3 and 4
Boscawen, New Hampshire

Dear Neighborhood Resident:

The Town has recently started designing improvements to the municipal infrastructure (sewer, and select drainage) in the area outlined on the attached work plan. The project design is advancing as part of our ongoing mission to provide reliable and efficient municipal services in Town.

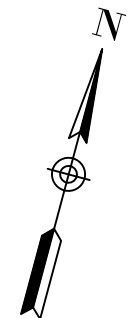

Starting on or around December 7, 2023, and through the remainder of the month you may notice personnel from Underwood Engineers and TF Bernier Survey gathering field information in the project area. The work will include topographical survey so you may see paint markings in the road as well as survey ribbon/flagging. Much of this work will be in the street and won't require heavy equipment or digging, but the field personnel at times will need to survey exterior portions of your property. Field personnel will be in safety vests and carry business card identification. They will do their best to minimize the inconvenience to you. You can help by not disturbing or removing the markings in the vicinity of your property to ensure all information can be gathered efficiently. We appreciate your understanding as we work together to keep this vital project moving forward.

Information regarding the Sewer and Water Improvements Phase 3 and 4 project can be found on the Town website at <https://www.boscawennh.gov/home/news/sewer-infrastructure-projects-3-4-receive-nhdes-funding>. If you have any questions or would like additional information, please contact Dan Rochette, P.E., Project Manager, Underwood Engineers at (603) 436-6192 or drochette@underwoodengineers.com or Dean Hollins, Town of Boscawen Public Works Director at (603) 796-2207 or dhollins@boscawennh.gov.

Thank you for your time, cooperation, and support.

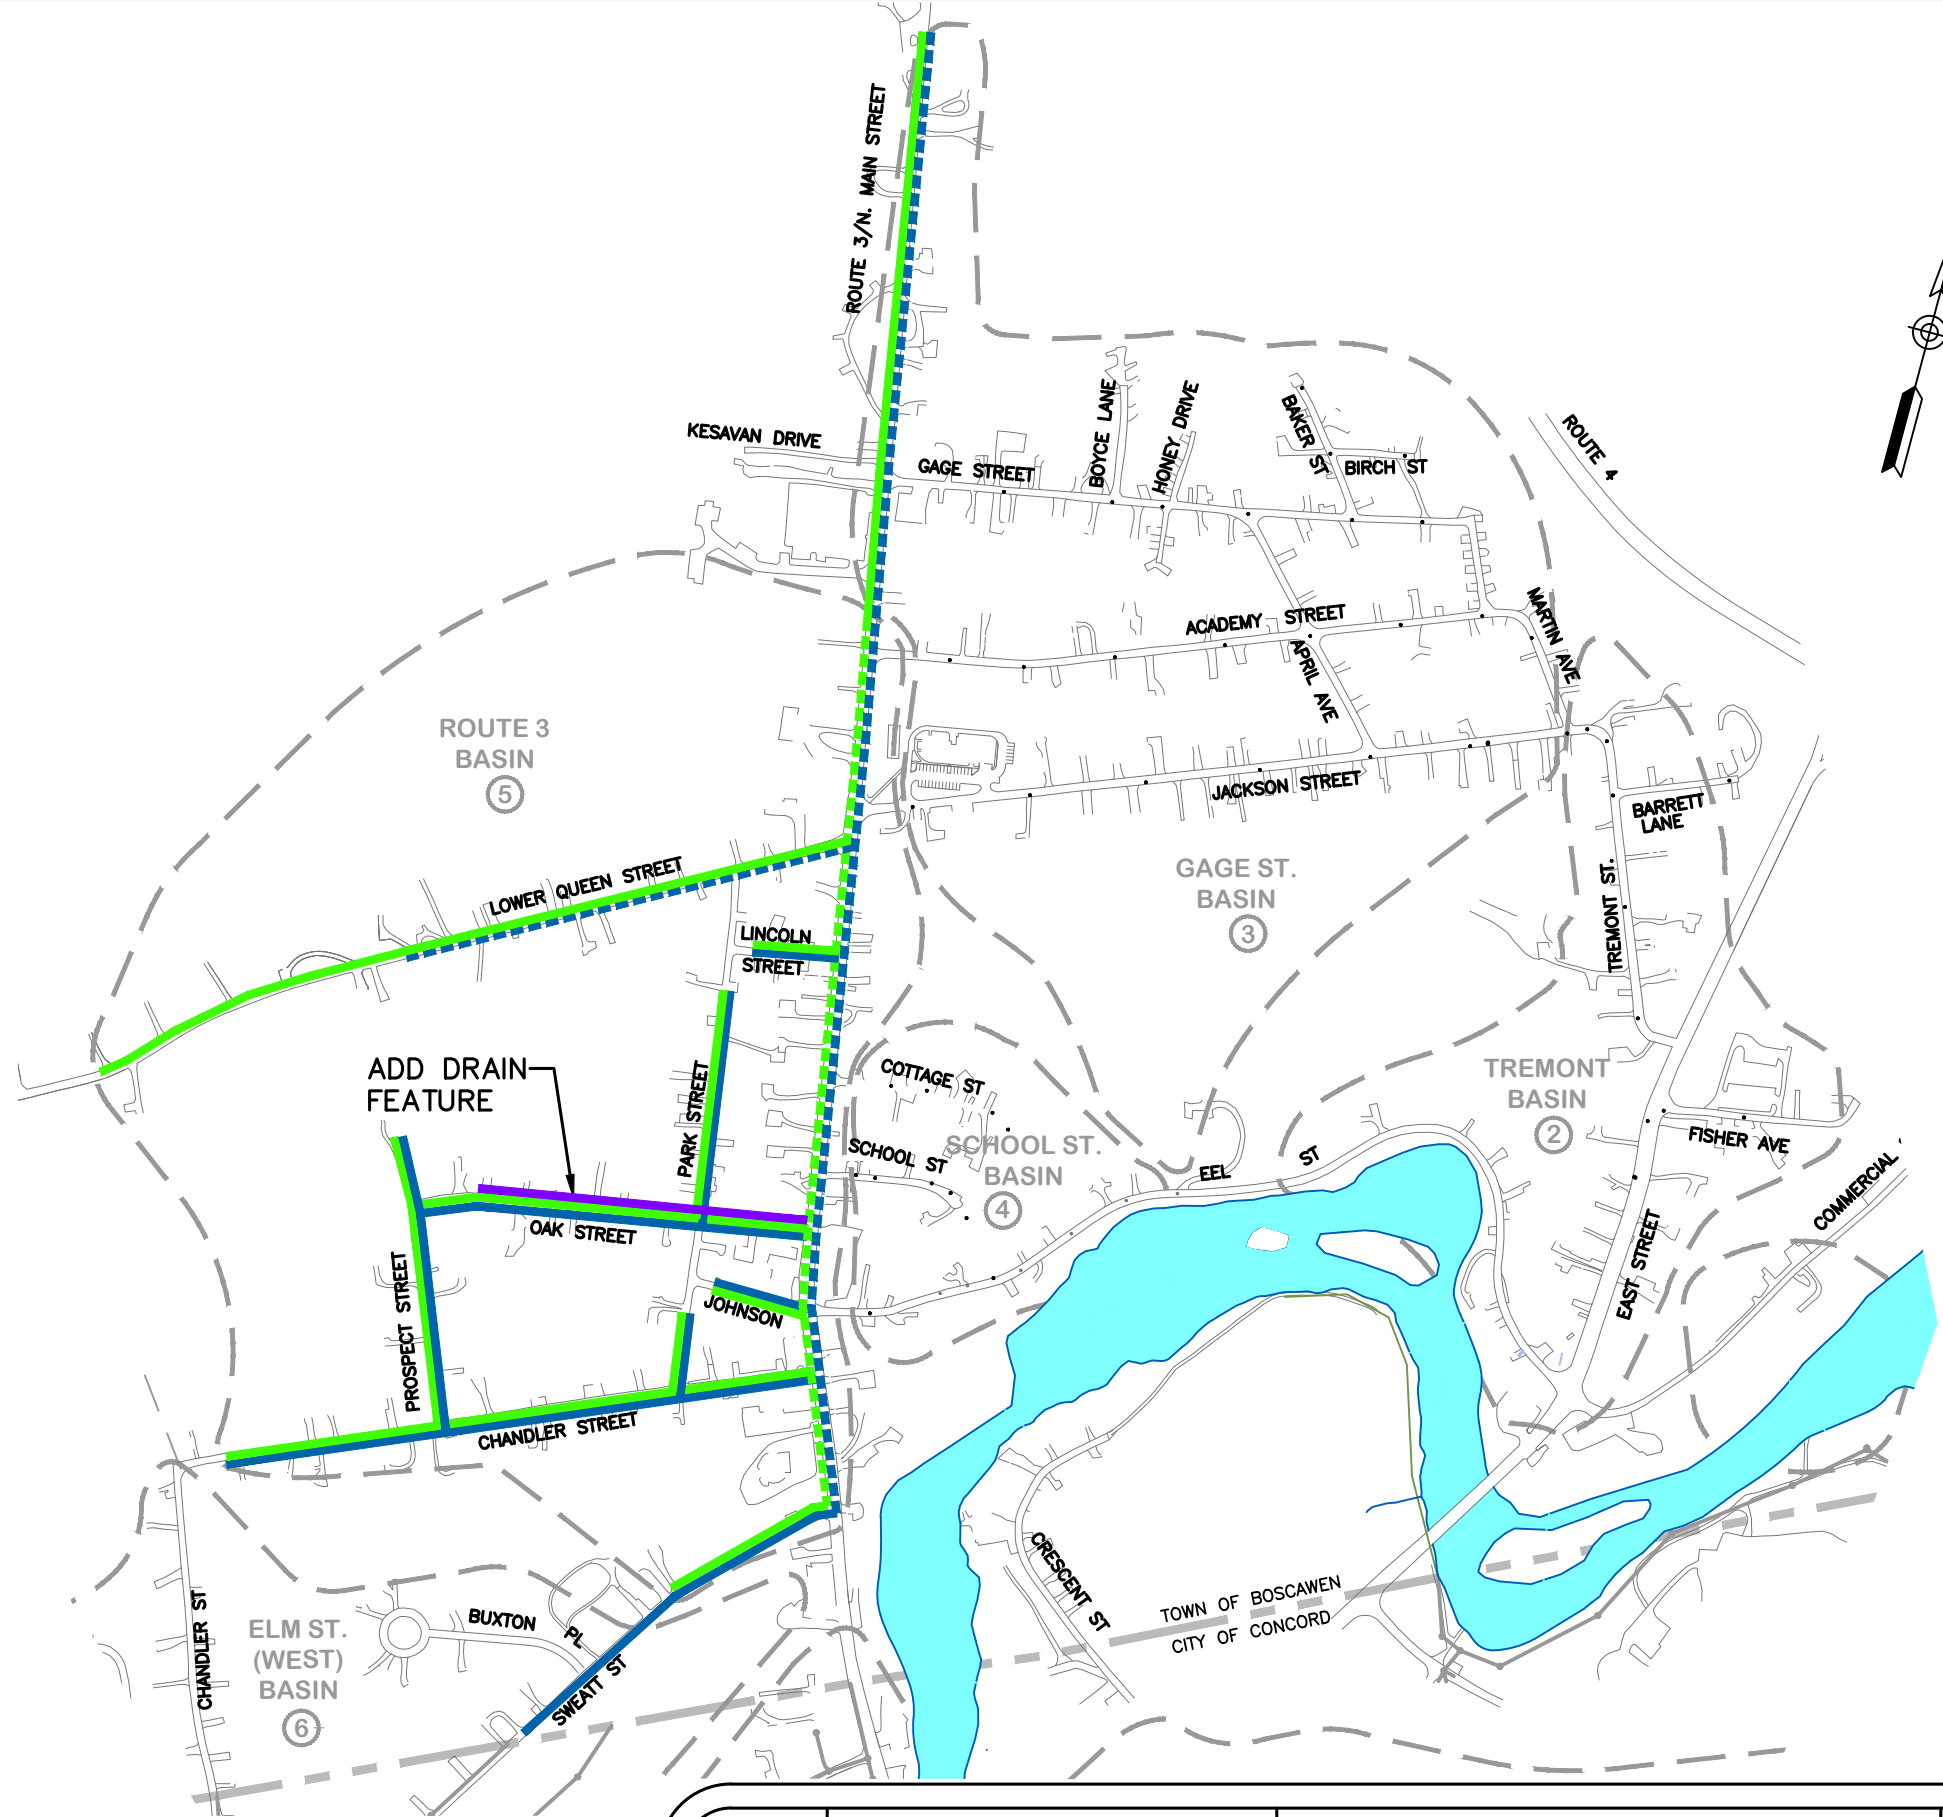

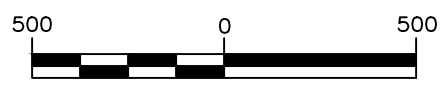

Very truly yours,

Katie Phelps
Town Administrator
